Memorandum
about cooperation
between Dnipro University of Technology (Ukraine)
and AgentFly Technologies (Czech Republic)

June 4, 2021   *Dnipro, Ukraine*

Dnipro University of Technology, represented by Vice-Rector for International Affairs Oleksandr Shashenko, and AgentFly Technologies, represented by Chief Technical Officer Milan Rollo, signed this Memorandum in order to develop mutually beneficial cooperation between the PARTIES.

Based on partnership, equality and mutual interest, the PARTIES will develop the following forms of cooperation:

– conducting joint basic and applied research in the fields of innovative technologies, development of complex products, 3D-modeling of production processes, mapping, thermography, laser scanning, etc.;

– exchange of scientific and technical information and joint publications of the results of research work in Ukrainian or Czech professional journals;

– organization of international scientific conferences to present the results of joint research;

– exchange of specialists and scientists in accordance with legal procedures of the relevant institutions in Ukraine and Czech Republic;

– establishing and expanding contacts with industry organizations, enterprises, research institutes, higher education institutions, industrial enterprises of Ukraine and Czech Republic in order to promote scientific products, new technologies and services in domestic and foreign markets;

– independent and/or joint search for different sources of funding joint projects, research and development.

Cooperation may be extended by mutual consent to other activities not specified in this Memorandum.
